

Servo Regulating Wheel Drive Retrofit Package Is Now Available

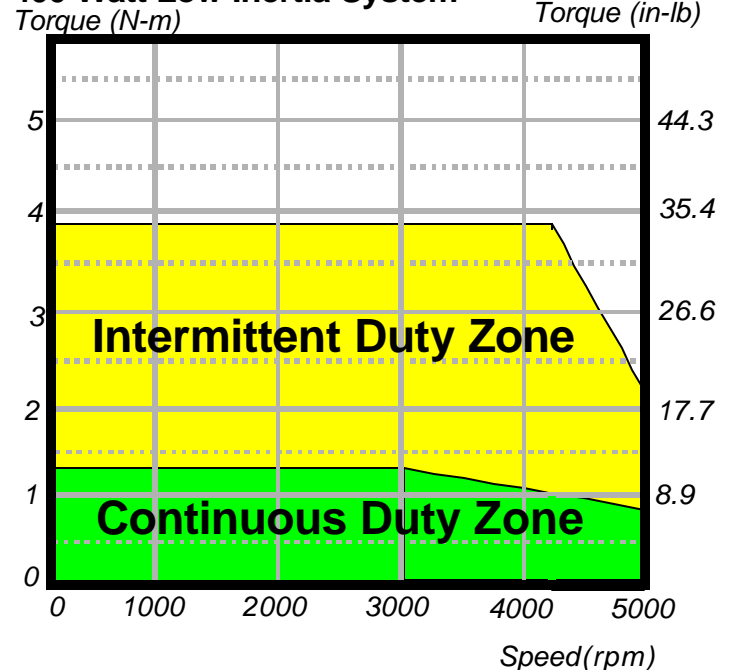

Royal Master has Now Available a Retrofit Package to Eliminate the Variable Speed Regulating Wheel Drive

Royal Master Grinders has introduced as standard equipment a servo driven regulating wheel drive. This unit is directly coupled to the regulating wheel housing, eliminating the need for many common maintenance items. This unit, affordable priced, is available as a retrofit unit that can be done without the requirement for a Royal Master Service Engineer. For More information call your sales engineer or Alan Schell in Customer Service.

Technical Details

- Sure Servo Motor has 400 Watt Low Inertia System
- 0-500 RPM Speed
- One Touch Dress and Grind Speeds
- Built in Dynamic Brake
- Tested on 2.5" Diameter x 3" Long Steel removing .020" on one thru feed pass without stalling
- Encoder Resolution of 2500 lines / 10,000 ppr
